

History & Background Information on Jiao Ying School

Jiao Ying School was founded in 1997 by Portland artist Jiao Ying. The school is well-known for its well designed curriculums for art, Foreign language program, mathematics, music, multicultural dancing, Chinese Wushu, Chess and Games, and adult classes.

The art program is well known for its wide range of teachings, from oil pastel art to watercolor, animal drawing, oil/acrylic painting, and creative drawing. Through the program, students grow in their understanding of using lines and shapes, colors, composition, and using different mediums. Our student's works have won top state, national, and international honors at contests such as the Oregon Human Society Annual Poster Contest, the Federal Duck Stamp Competition, and the Cray-Pas Wonderful Colorful World Competition. Student works have been shown on KOIN6 and KATU, as well as written about in newspapers such as the Oregonian, Tigard Times, and etc.

The language program features the effective teaching of Chinese Mandarin and English with various exercises that enhance the study of speaking, reading, writing, and daily use with textbooks that are very much preferred by our teachers, students, and parents.

The Summer Camp program for 2014 will include the foundation art classes of the regular program, with additional training on the use of other materials, styles of art, and techniques. Students will use different art materials everyday to accomplish different techniques that will complete works of different subject matters, styles, or genres of art. Teachers will not only guide students step by step and introduce them to different methods, artists, compositional choices, but also educate them on different elements of art and art history to give them a well rounded experience and learning of art. Morning art classes will focus primarily on fine art classes that exercise student's basic skills in drawing and coloring, and afternoon classes will focus more on creative projects with 3D materials and the chance to generate works from their own imagination and creative, with the help and instruction of teachers.
